University

ANU ZERO- CARBON ENERGY FOR THE ASIA- PACIFIC (ZCEAP) INITIATIVE

ANU ZCEAP aims to transform the way Australia trade with the world

Six programs within ZCEAP

Hydrogen Fuels

Green Metals

Renewable Energy Systems

Indigenous Engagement with Renewable Industries

Renewable Policy & Governance in APAC countries

Regulatory Frameworks for Renewables-based Trade and Investment

INTERNATIONAL GREEN ECONOMY COLLABORATIONS

International Green Economy Collaborations:

are international policy collaborations aimed at achieving **mutual** benefits for industry and the environment through supporting structural change in both domestic economies and shared value chains.

Examples include:

- Australia-Singapore Green Economy Agreement,
- Proposed US EU Carbon-Based Sectoral Arrangement on Steel and Aluminium Trade,
- EU-Japan Green Alliance,
- Just Energy Transition Partnerships

open-access paper

What comprises IGECs?

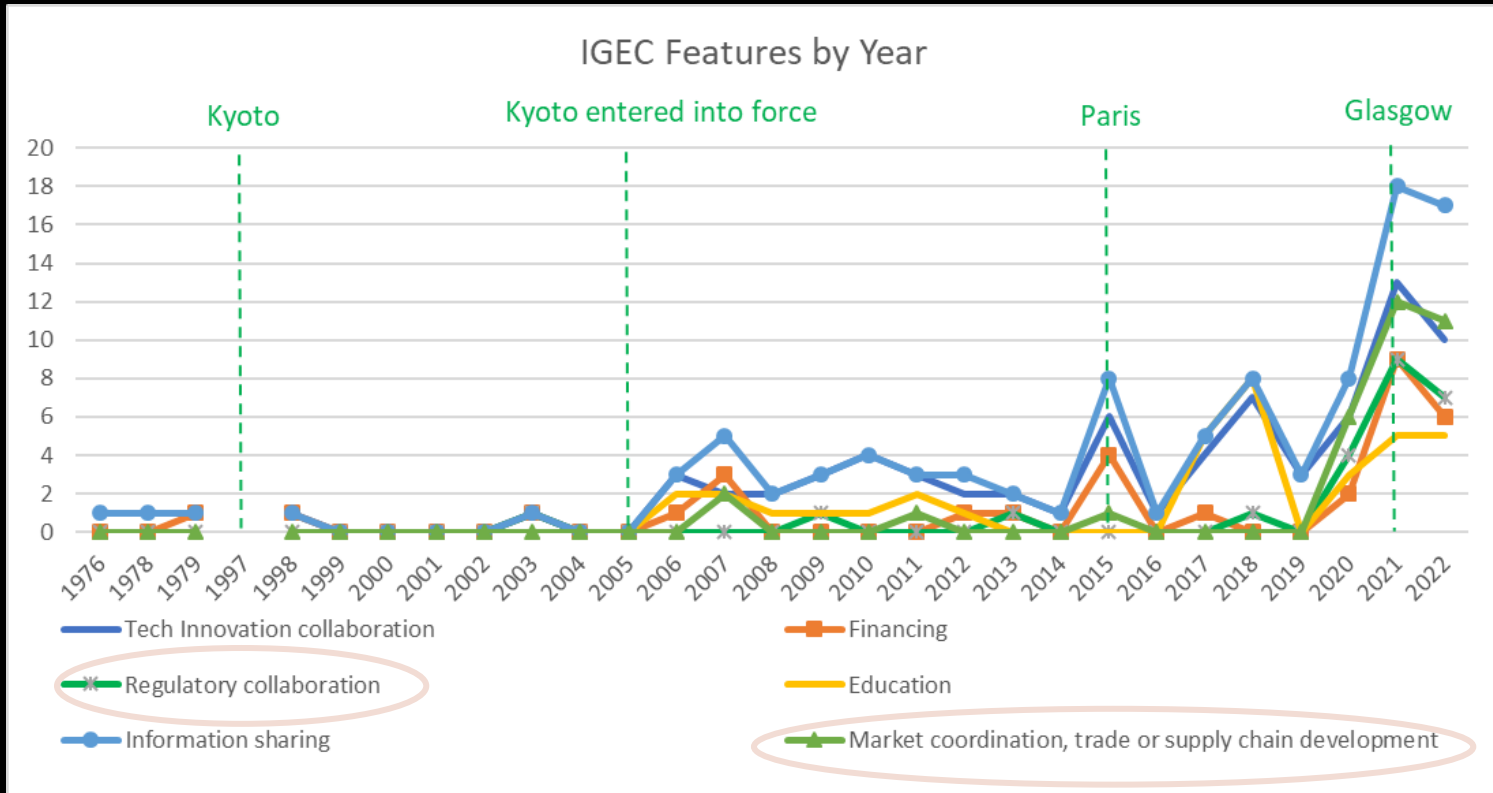

IGEC Feature	Examples
Information sharing	Regular information sharing meetings
Technology collaboration	Joint R&D projects
Regulatory collaboration	Embedded emissions accounting frameworks
Education	Training of government officials
Financing	Commitments to financial support for industries in partner or coordination of support to third party
Market Coordination, Trade or Supply Chain Development	Coordinated investment in port facilities, joint feasibility studies

Broad functions of IGECS

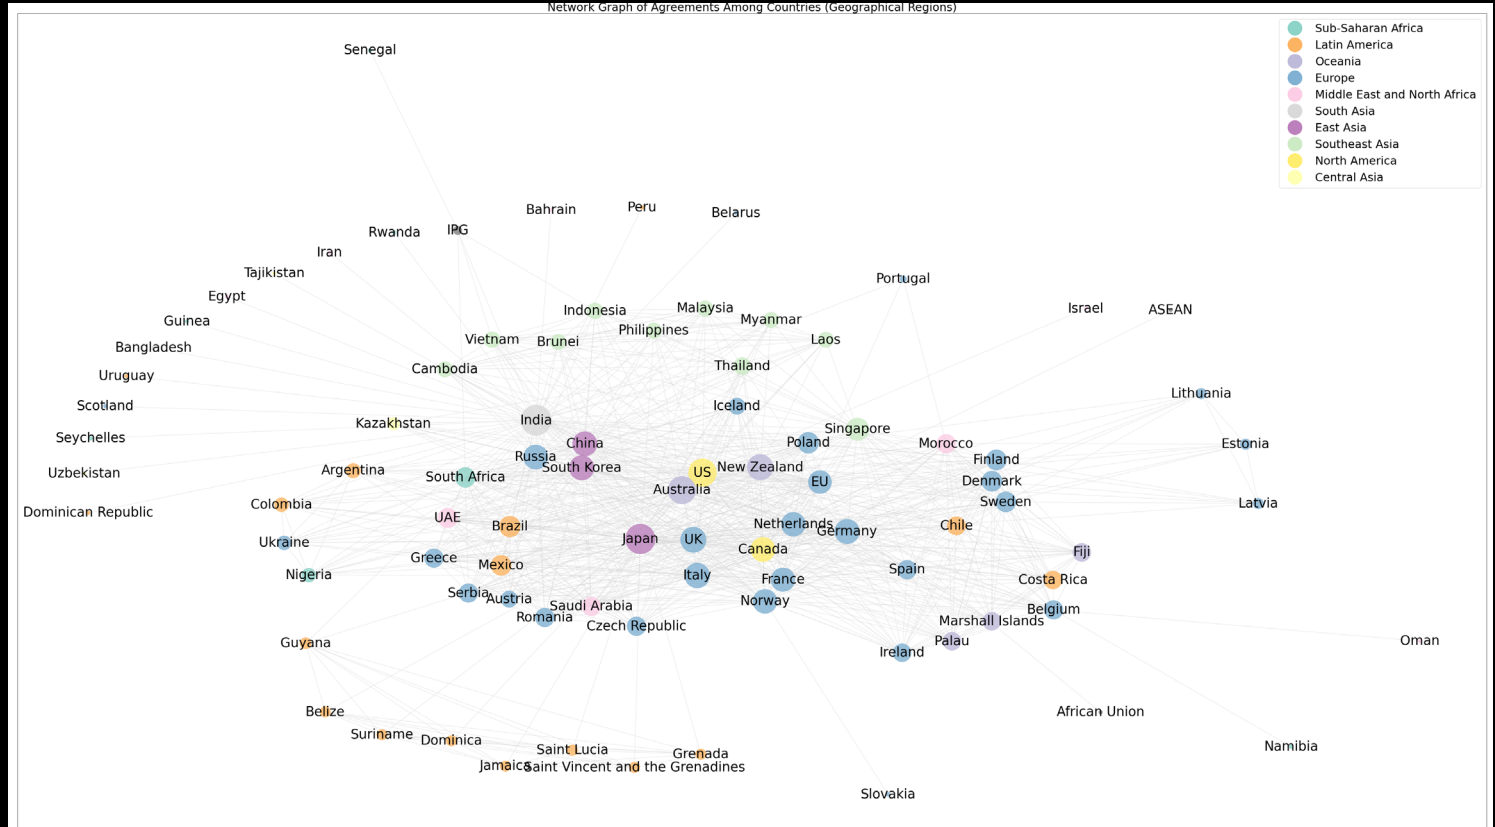

IGECs are becoming more common

LATAM countries are part of the IGEC network

But somewhat scattered currently due to lack of internal collaboration

Conclusion

- International Green Economy Collaborations can help facilitate green trade and investment.
- Can be understood as Industrial Policy for green cross-border supply chains
- IGECs provide a pathway for regulatory collaboration and alignment
- Exporters can have a role in shaping emerging frameworks for trade and investment including embedded emissions accounting frameworks
